1997 TITLE & AUTHOR INDEX

Title Index

Application of Photo-viscoplasticity to Geotechnical Engineering, T. Nishitani, M. Tsuji, M. Suetsugu, H. Ogura, 12-14 (Jan/Feb).

Blunt Notch Extended Compact Tension (BN-ECT) Specimen for the Study of Short and Long Crack Propagation, R. Prabhakaran, R.S. Piascik, 24-26 (Mar/Apr).

Comments on Fiber Optic Polarimetric Dynamic Force Sensor, O.D. Cortazar, H.A. Larrondo, D.R. Avalos, P.A.A. Laura, 36 (Mar/Apr).

Compression Cycling of Multiple Samples with Controlled Environments, E.G. Wolff, S. Tyagi, 24-27 (July/Aug).

Construction and Use of a Clear Acrylic Phantom to Generate a 3-D Finite Element Model of the Human Pelvis from CT Data, J.W. Plummer, 30-32 (Jan/Feb).

Correction for System Compliance During Point-Loading of Thin Brittle Films, C. Liu, E.D. Case, 28-31 (Mar/Apr).

Corrections for Gage Factor and Wheatstone Bridge Nonlinearity, X. Wang, 33-34 (May/Jun).

Demonstrating Moire Fringes Using Gratings Produced with a Laser Printer, M.E. Tuttle, 19-22 (Sept/Oct).

Digital Shearography for Nondestructive Testing and Vibration Analysis, W. Steinchen, L.X. Yang, G. Kupfer, 20-23 (July/Aug).

Experimental Evaluation of Ender Nailing as a Femoral Intertrochanteric and Subtrochanteric Fracture Fixation Technique, A.H. Elkholy, 28-32 (May/Jun).

Experimental Technique to Investigate the Dynamic Indentation Hardness of Materials, B.J. Koeppel, G. Subhash, 16-18 (May/Jun).

Full Scale Testing of Prestressed Concrete Bridge Girders, T.M. Ahlborn, C.K. Shield, C.W. French, 33-35 (Jan/Feb).

Image-averaging in the Analysis of Data From Fuji Pressure-sensitive Film, A.B. Liggins, J.B. Finlay, 19-22 (May/Jun).

Innovative Experimental System to Test Response Time and Reliability of Neonatal Flow-triggered Ventilators, F.P. Branca, P. Cappa, S.A. Sciuto, 15-18 (Mar/Apr).

Investigating Fiber Tow Crimping Effects in Braided Composite Materials, A.C. West, D.O. Adams, 15-18 (Sept/Oct)

Laboratory Demonstration of Pure Bending of Unsymmetric Beams, M.E. Tuttle, 13-16 (July/Aug).

Light Emitting Diodes for Illumination in Photoelasticity, T.W. Ng, A. Asundi, 28-30 (July/Aug).

Measurement of Modulus in Filament Wound Ring Specimen Using Split Disk Test, S.H. Yoon, W.M. Cho, C.G. Kim, 25-28 (Jan/Feb).

Measuring Fracture Toughness with a Chevron-notched Crack-arrest Specimen, R.J. Bonenberger, 31-36 (July/Aug).

Mechanical Testing of Polysilicon Thin Films with the ISDG, B. Yuan, W.N. Sharpe, Jr., 32-35 (Mar/Apr).

Microphone Positioning System for Acoustical Reverberation Chamber V.J. Pisio, G. Kiss, M.G. Faulkner, 21-24 (Jan/Feb).

Modification of The Rectilinear Groove Method for The Analysis of Uniform Residual Stresses, G. Petrucci, B. Zuccarello, 25-29 (Nov/Dec).

Normal and Tangential Force Calibration in Fretting Fatigue Test, B.H. Lee, H.K. Kim, S.-B. Lee, 9-12 (Mar/Apr).

On the Use of Color Imaging In Experimental Applications, D.E.P. Hoy, 17-19 (July/Aug).

Optimizing the Design of a Structural Device by Means of Models, J.C. Paloto, N.F. Ortega, 21-23 (Nov/Dec).

Opto-mechanical System for the Alignment of a Gas Gun Barrel, A. Watterstam, G. Andersson, 23-25 (Sept/Oct)

Photoelasticity Using Retroreflection, E. Liasi, W. North, P.I. Makrygiannis, T. Rocheleau, 17-19 (Jan/Feb).

Problems Encountered in Measuring Forces Over Immersed Bodies, S. Kuhtz, P.W. Bearman, J.M.R. Graham, 20-23 (Mar/Apr).

Strain Gage Behavior on Sandwich Glasses, R. Steindler, 23-27 (May/Jun).

Subtle Errors in Digital Experimental Data Processing, K.G. McConnell, D.O. Adams, P.O. Holst, 15-18 (Nov/Dec).

Tension Test for Alumina Ceramic Materials Using Open-loop and Closed Loop In-Situ Loading Device, F. Wu, M.L. Wang, 35-39 (May/Jun).

Test Fixture for Mapping Thermal Conduction in Composites Under Transient and Steady-state Conditions, B.G. Carkhuff, J.C. Roberts, 12-14 (May/Jun).
